WORLD LEADER IN DIGITAL SIGNAGE HARDWARE

WHAT DOES IT DO?

Menus. Signs. Everything.

Our powerful hardware offers the complete solution for your business needs. With our digital signage devices, you'll have the opportunity to immediately display information to the people that matter the most. Own a restaurant? How about having an up-to date menu in a matter of a few mouse clicks. Have an office setting with high amounts of traffic? How about displaying important information to clientele that is required before your meeting. Simply want extra revenue by advertising? Done. Our devices do it all. Imagine your business with your very own digital display, your own Times Square.

HOW DOES IT WORK?

The magic behind it all.

Our sophisticated hardware is engineered and stressed tested to ensure a stable, reliable apparatuses. that exceeds your expectations. Our nerds in the lab ensure the setup process is easy and pain-free. Essentially, you design your own sign with this software that sends it over to this little box connected to your display and runs for the hours of your business. The software allows you to fully customize the sign according to your business needs. Now, there are several types of hardware we offer and upon a free consultation-- we can more appropriately recommend a solution tailored to you.

IN RESTAURANTS

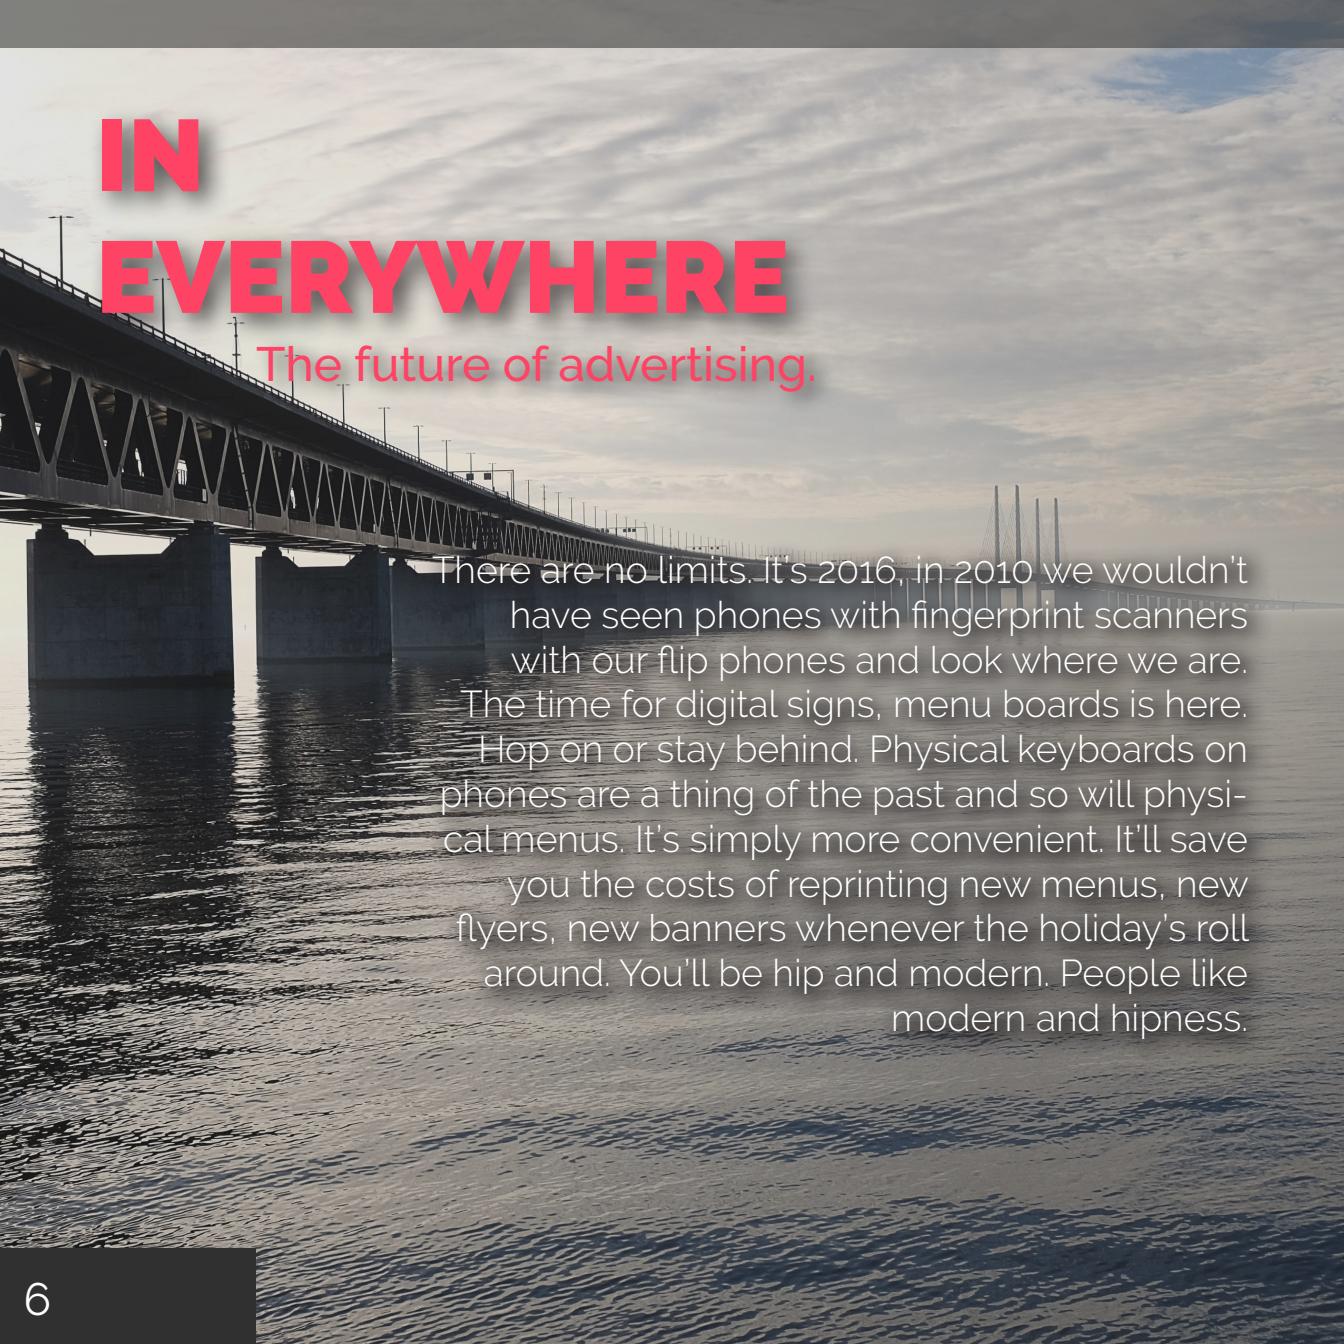

From appetizers to specials.

Display beautiful signs in your locations with up to date information regarding menus, specials, and promotions. Give your customers the opportunity to view a larger selection with our Premium 4k hardware. Our easy to use software gives you the opportunity to set different schedules that will automatically update information when you need it, before you know it. Holiday menu's, birthday specials, happy hours and everything of that sort is available for display with the help of our hardware.

IN HOSPITALS

Room numbers & wait times.

Time is man's greatest luxury. One simply can't get it back. Immediately let patients and visitors know where to go upon arrival, transfer, and dismissals. Our intuitive software allows you to customize your sign with all types of information, from room numbers to average wait times. Let patients know they're in good hands upon arrival and display necessary information before they reach your desk for efficiency.

IN

EVERYWHERE

The future of advertising.

There are no limits. It's 2016, in 2010 we wouldn't have seen phones with fingerprint scanners with our flip phones and look where we are. The time for digital signs, menu boards is here. Hop on or stay behind. Physical keyboards on phones are a thing of the past and so will physical menus. It's simply more convenient. It'll save you the costs of reprinting new menus, new flyers, new banners whenever the holiday's roll around. You'll be hip and modern. People like modern and hipness.

OURS & THEIRS

Premium. Quality. Guarantee.

Our product is quality. You're getting the premium stuff when you buy from us and that's being straight up. Not only that, we're so confident in our product that we offer 2 and 3 year warranty options depending on the model you go with, for FREE. We're not selling hardware, we're selling the future. Bro, if you ever encounter any dilemmas setting it up or need help with the design process, we're here to help. At the end of this brochure, you'll find contact information.

CORE MINI

The essentials.

You have to start somewhere, so start with our CORE mini. This little guy does the essentials for displaying your signs in restaurants, hospitals and whatever locations that does not require displaying tons of information. This digital signage player is for restaurants seeking to display a simple menu, a corporate office showing where different rooms are in the halls, and anything in between.

CORE

MINI 4K

Size doesn't matter.

So you want the good stuff? This is the CORE mini with 4K capabilities. This guy will be able to display the finer things in life. High definition video, RSS feeds, weather widgets, premium picture quality and much more.

The antennas in this model provide a more stable Wi-Fi connection to your router ensuring you're online 24/7. You simply can't go wrong with this device if you consider the Mini series.

CORE STANDARD 4K

Starting with 4K.

So you want 4K but don't need all the fancy stuff. We have the solution for you. With our CORE Standard 4K Digital Signage Player (that's a mouthful), you're able to display 4K content to keep everything looking nice and crisp and not worry about implementing extra features like weather widgets, RSS feeds, HTML5 stuff and more. It simply does the job, beautifully.

CORE UPGRADED 4K

A small kick from the essentials.

This guy does whatever the previous guy doesn't. Want weather widgets? How about a nice RSS feed? Video playback in the background? Yup, it does that as well. With this little box, you'll be able to piece together multiple pieces of information to perform a harmonious playback for your clientele. Not only that, it has upgraded hardware to be able to handle all of these awesome knick knacks here and there. This is an experience that will not dissappoint.

CORE PREMIUM 4K

Now we're talking.

You made it this far, now it's time to talk real hardware. This metal enclosed device is top of the line in the CORE series. Lots of RAM, enhanced dual-band antennas, Android Lollipop, and much more make this a true warmachine. In theory, with the proper setup- this device can handle 4K output with touch capabilities with compatible devices. The carefully engineered ventilation system provides maximum stability and years of longevity. This device truly terminates any competition in our way. It does everything the other devices can do and more.

WHICH ONE DO YOU NEED?

How to pick one.

There's a lot of options and we can understand most of this sounds redundant but there's a key to all this madness. To put simply, each device is tailored for different business purposes and setups. To ease the process, we typically recommend the following products for the following business types:

CORE mini = Small businesses/Small Restaurants with simple menus and *budget-conscious*.

CORE mini 4K = Again small businesses, with static displays but want the good stuff. The business that wants *premium output* with beautiful playback.

CORE Standard 4K = This is for small businesses that want *essential fancy widgets*.

CORE Upgraded 4K = This is office type settings, hospitals, retail locations and everything in between.

CORE Premium 4K = Shopping malls, interactive stores, multiple display setups, outdoor displays and the sort.
